

**AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Original) A food/beverage container comprising:  
  
a main body having a main receiving cavity containing contents and a spouting portion for discharging the contents; and  
  
a sub-receiving cavity formed in the main receiving cavity to receive other foods,  
  
wherein the main receiving cavity and the sub-receiving cavity are separated from each other.
2. (Original) The food/beverage container of claim 1 wherein the sub-receiving cavity is sealed by a seal member.
3. (Original) The food/beverage container of claim 1 wherein the spouting portion is closed by a closer.
4. (Original) The food/beverage container of claim 1 wherein a spout member is installed in the spouting portion.
5. (Original) The food/beverage container of claim 1 wherein the spouting portion is provided with an air intake hole.
6. (Original) The food/beverage container of claim 1 wherein the spouting portion has a straw insertion hole or a spouting hole.
7. (Original) The food/beverage container of claim 1 wherein the spouting

portion has a cutting film provided with a pulling handle with a cutting line.

8. (Original) The food/beverage container of claim 1 wherein the spouting portion includes a folding portion to be bent in a direction.
9. (Original) The food/beverage container of claim 1 wherein the main body is increased in a diameter as it goes downward.
10. (Original) The food/beverage container of claim 1 wherein a bottom of the main body is sealed by a seal member.
11. (Original) The food/beverage container of claim 1 wherein the main body receives a sub-container body coupled on a top of the main body, the sub-container body defining the sub-receiving cavity and provided with a spouting portion.
12. (Original) The food/beverage container of claim 2 wherein the seal member is designed to reseal.
13. (Original) The food/beverage container of claim 4 wherein the spouting portion includes an operating spouting member slidably inserted in the spouting portion.
14. (Original) The food/beverage container of claim 4 wherein the spouting member includes a sub-spouting member.
15. (Original) The food/beverage container of claim 8 wherein the spouting portion is capable of bending into the sub-receiving cavity.
16. (Original) The food/beverage container of claim 11 wherein the sub-container body is tightly coupled to the main body through an insert forming process, a supersonic wave bonding process, a press forming process, or a screw-coupling process.
17. (Original) The food/beverage container of claim 11 wherein the main body is a metal can, a paper pack, or a pouch.
18. (Original) The food/beverage container of claim 11 wherein the sub-container

body is provided with a cutting film with a cutting line and a pulling handle coupled on the cutting film.

19. (Original) The food/beverage container of claim 11 wherein the sub-container body is provided with a cutting hole and a closer for closing the cutting hole.

20. (Currently Amended) The food/beverage container of ~~any one of~~ claims 18 and 19 wherein a paper filter is received in the sub-receiving cavity of the sub-container body.
